KACE

KACE Services –
Capability Statement

COMPANY OVERVIEW

KACE Services is a strategic Government Contracting (GovCon) firm specializing in the **modernization, stabilization, and operational assurance of mission-critical enterprise systems.** We support federal agencies and prime contractors operating in **failure-intolerant environments,** where system outages, payroll disruptions, or release defects directly impact mission operations.

KACE brings **enterprise-scale ERP experience, risk-first delivery discipline,** and **applied automation** to federal modernization programs requiring high reliability, compliance, and continuity of operations.

Modernizing mission-critical ERP and enterprise systems through disciplined quality engineering, release assurance, and applied automation.

CORE CAPABILITIES

ERP & Enterprise Systems Modernization

- SAP ECC to S/4HANA modernization; ERP, HCM, Payroll, Finance, Procurement, and HR platforms; enterprise systems supporting identity, reporting, and integrations; cloud transitions; legacy stabilization; cutover and go-live assurance.

Digital Engineering & Transformation

- Independent Verification & Validation (IV&V); digital quality engineering; DevSecOps quality gates; CI/CD stabilization; release governance; operational readiness and cutover risk management.

Applied AI in Cybersecurity & Enterprise Risk

- ERP and enterprise systems expertise in failure-intolerant environments; risk-first digital engineering model; applied AI where cyber risk actually lives; audit-ready, compliance-driven execution; prime-friendly partner delivery model.

DIFFERENTIATORS

ERP and enterprise systems expertise in failure-intolerant environments

Risk-first digital engineering model

Applied AI where cyber risk actually lives

Audit-Ready, Compliance-Driven Execution

Prime-friendly partner delivery model

RELEVANT EXPERIENCE

- Led **large-scale ERP** and enterprise cloud modernization supporting 10,000+ customers.

- Achieved 100% CI/CD stability across **SAP HANA-based** and enterprise platforms.

- Led **zero-error** payroll and HR system migrations.

- Supported **federal acquisition lifecycle** activities including requirements definition, technical evaluation support, proposal development, and post-award execution alignment.
